

## Conference

### « Energy harvesting wireless sensors and actuators, for building (home and office) automation »

**March 14, 2013 starting 19:00 at Forum Da Vinci**

Based on enOcean's wireless and energy harvesting sensors and actuators for building automation, the conference speakers will present

- the technology behind,
- the application areas in home and office automation, and their benefits
- existing and available products based on enOcean's technology.

Building automation is a well-known issue, but together with wireless and energy harvesting devices, requirements of power consumption, comfort enhancements, smart metering, smart home, together with ease of integration get a new momentum.

Conference speakers:

#### **Carlo Posing**

Owner & director, **RMS.lu s.a.**

- RMS.lu since 1992 active in the AIDC (Automatic identification and data capture) Industry
- Integrator : Mobile and POS systems, based on Barcode and RFID technology
- BS in Business administration Miami University 1991

#### **Ivan Halsberghe**

Administrateur Délégué, **Serelec n.v.**

- since 1995
- distributor for Belgium, France, Luxemburg, enOcean based Eltako products
- Degree in in engineering

The conference will be followed by a networking cocktail.
