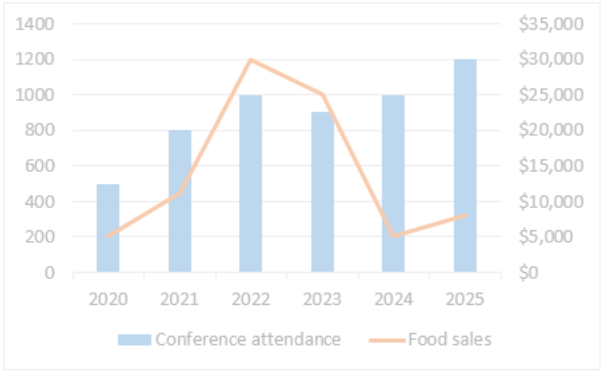
A1 | Great charts recommended for you

Secondary axis

You can also use a **secondary axis** in a chart. A secondary axis is an additional value axis that can show different values than the other value axis.

A popular example is on the right. It's the same as the chart above, but it has an additional secondary vertical axis that represents the sales amounts for each month. Some would say that by having a secondary axis, you almost have "two charts in one." That's true. This chart is both a column chart and a line chart. These kind of charts are called **Combo charts** in Excel. If you're interested in this kind of chart, click the link at the bottom of this sheet.



Who owns Excel documents in an organization?

Date	Conference attendance	Food sales
2020	500	$15,000
2021	800	$11,200
2022	1000	$30,000
2023	900	$20,000
2024	700	$12,000
2025	1000	$31,000

Data that supports the secondary axis above

More information on the web

- Create a chart from start to finish
- Create a combo chart with a secondary axis
- Available chart types in Office

EXTRA CREDIT

Try making a combo chart. Select the data above, and then click **Insert** > **Recommended Charts**. At the top, click the **All Charts** tab, and then click **Combo** at the bottom. On the right, click the Secondary Axis checkbox for **Food sales**.

Turning AI into a universal platform

AI as a platform like

Everyone has it.

Everyone uses it.

Everyone learns to master it.

Everyone creates with it.

Our Vision with AI

Confidential and property of Cebi Group.

AI Program Framework

Why do we do AI

How we operate

Intake & prioritization	Build & operate	Oversight & risks mitigation	Continuous improvement
AI Opportunity heatmap	Standardized Project lifecycle	AI Review board	Feedback loop
Project proposal template	Model/Agent registry	Monitoring & audit	Value & KPIs

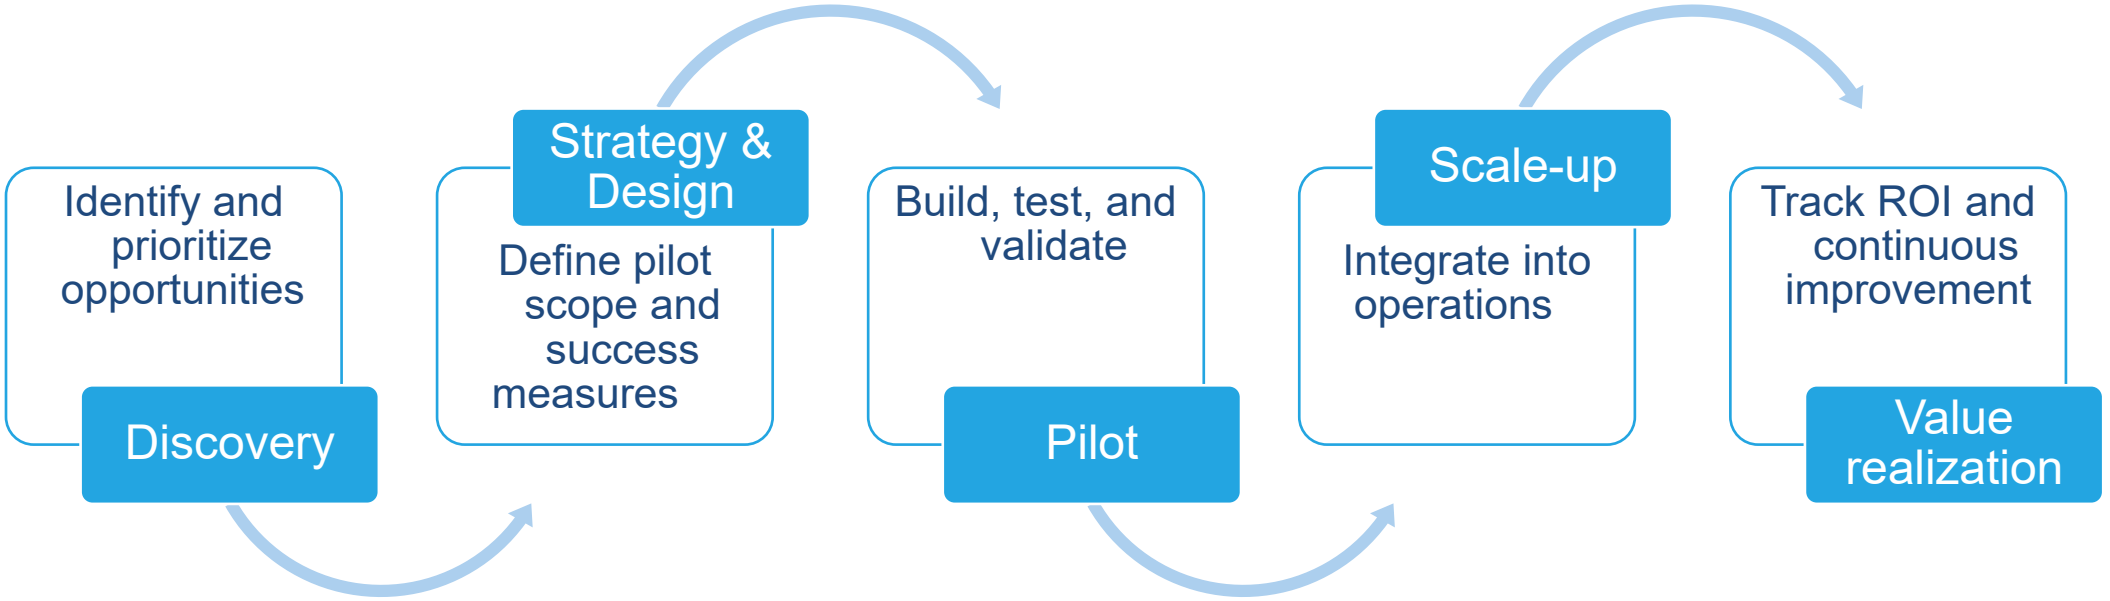
The foundations

AI Code of Ethics AI Policy AI Data Governance	Knowledge management

Confidential and property of Cebi Group.

Methodology of implementing AI solutions

Change & Enablement: Prepare people and processes for AI adoption through training, communication, and support.



Governance: Ensures compliance, risk management, and ethical oversight are applied consistently across all AI projects.

Tools and solutions use at Cebi

ChatGPT

Democratizes AI by giving every employee a “co-pilot for ideas and words”

Safe, anonymized environment for drafting, summarizing, and ideating across all functions.

Microsoft Copilot

Embeds AI into daily workflows (emails, coding, spreadsheets, presentations) to boost productivity instantly.

Approved for Internal and Confidential data already within M365, ensuring secure use in everyday tasks

Custom AI Agents

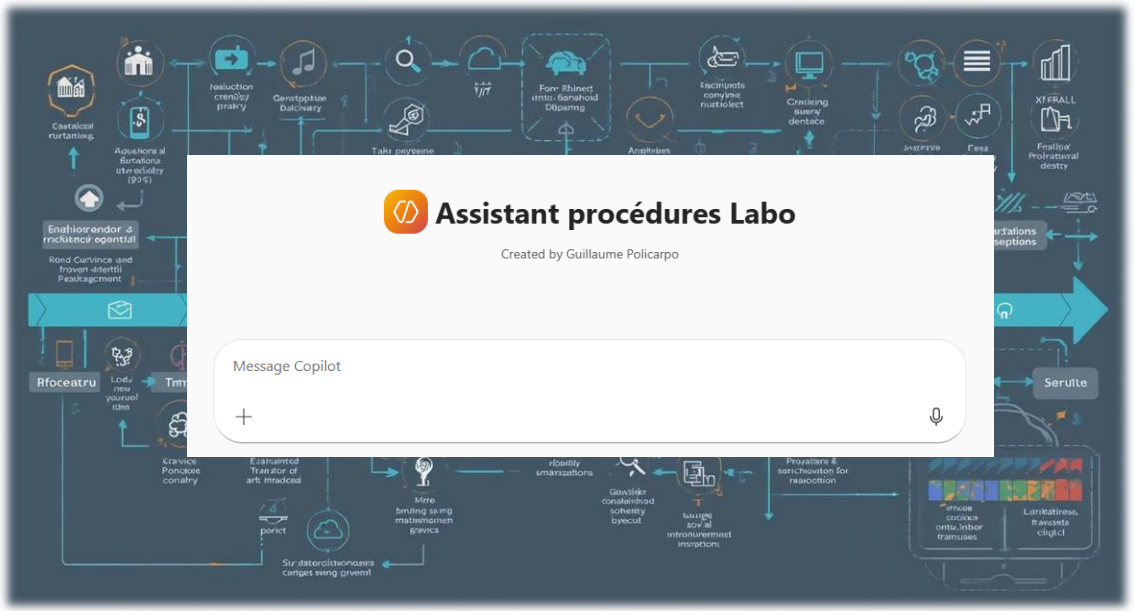
Built on Cebi’s infrastructure to handle sensitive and business-specific tasks securely.

Enable automation of local processes (e.g., document management, legal, HR) while respecting strict data governance

Confidential and property of Cebi Group.

Some use cases successfuly implemented

Purpose	**AI-powered assistant to review contracts, flag risks, and align with Cebi Legal Guidelines**
Benefits	• Faster, consistent contract analysis • Avoids hidden liabilities & unclear obligations • Structured, time-saving workflow
Our Experience	• Strong enthusiasm from users • Training needed to avoid security risks



Purpose	**AI-powered agent to quickly search, retrieve, and guide employees through company procedure documentation**
Benefits	• Saves significant time in audits and daily work • Reduces stress and uncertainty for employees • Promotes consistent application of procedures & inter-department collaboration
Our Experience	• Challenge: keeping documentation up to date remains essential • Assistant adoption improved collaboration across departments

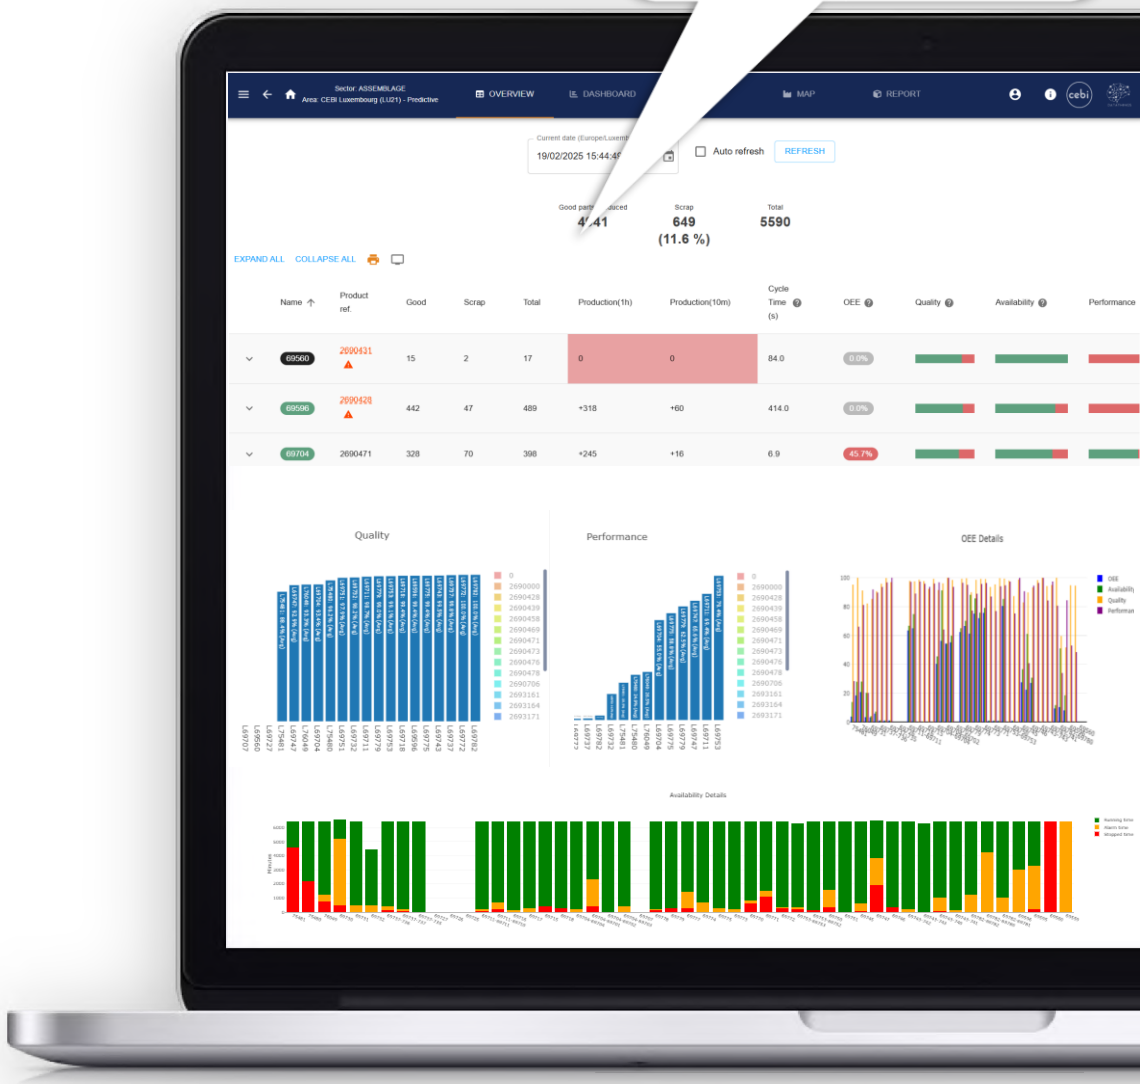
Because it’s not only about GenAI

An Industrial DataOps platform and a plug-and-play Digital Twin to visualize, predict and act, in real time, powered by AI.

PREDICTIVE

- Real-time **process instability alert**
- Machine setup **AI-assistant**
  Provision optimal parameters to minimize scrap
- **Bottlenecks** detection
  Prevent cycle-time augmentation
- Production and OEE **forecasting**
  Live adaptation of operations to meet targets
- **Sustainability** Insight
  Predict most environment-friendly production plan



+20%	-35%	< 8 weeks
OEE improvement	Downtime	Time-to-value

Average observed after the deployment in 10 factories worldwide.

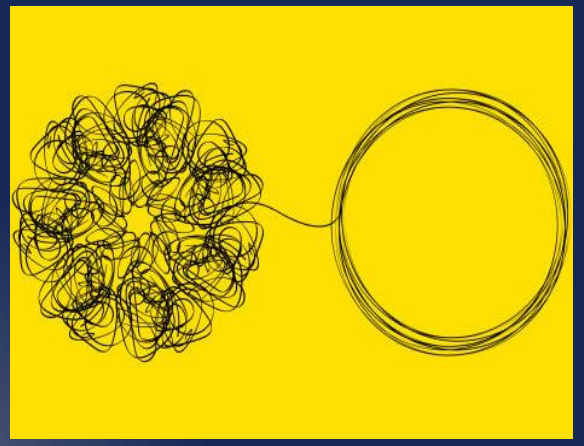
4 Lessons Learned

Insights for effectively implementing AI in your organization and ensuring successful adoption among teams.

Avoiding Noise

Don’t chase every shiny new AI tool. Focus on one powerful tool that fits most needs to ensure clarity and effectiveness.



Be Pragmatic

Select motivated users, support them, and spread adoption through their success to create a sustainable AI culture within your organization.

Don’t Chase Perfection

Try, make mistakes, be humble, improve, and iterate. Embrace the process of improvement rather than aiming for flawless execution from the start.

Keep Learning

With AI, we are all beginners. Foster a culture of curiosity and continuous education to adapt and grow with evolving technologies.

Thank You
