Engineering Trainee Days
Information for companies

Description:

The Engineering Trainee Days give students aged 16 and above the opportunity to experience the daily work of a STEM professional by accompanying them for **two full days during the week of 22 to 26 March 2027.**

More than a traditional company visit, the Engineering Trainee Days immerses students in a **real working environment,** where they can discover different STEM professions and career paths, interact with professionals and gain first-hand insight into the world of STEM.

The Engineering Trainee Days are a joint initiative of the Association Ingénieurs et Scientifiques du Luxembourg asbl and Jonk Entrepreneuren Luxembourg (JEL) asbl, with the support of the Ministry of Education, Children and Youth.

Why participate?

The Engineering Trainee Days are an opportunity to **open your doors to young people** who are actively exploring their future studies and careers and show them the diversity of opportunities within your field.

By participating, your company can:

- show young people **what STEM careers look like** in practice;
- introduce students to the **different professions and opportunities** within your company;
- **connect with young people early in their career journey**, some of whom may become tomorrow's students, interns or young professionals in your field
- give your employees the opportunity to **share their work and career journeys**;
- help **raise awareness of your field of activity and STEM professions** in Luxembourg.

Your professionals' experiences and career journeys can help inspire the next generation.

ENGINEERING TRAINEE DAYS

Jonk Entrepreneuren Luxembourg
Member of JA Worldwide

What does participation involve?

Participating companies welcome **one or more students for two full days**, giving them the opportunity to accompany STEM professionals and discover their daily work.

The experience can be adapted to your company's activities and working environment and may include job shadowing, exchanges with professionals and opportunities to participate where possible.

How to participate?

Companies interested in taking part can register via the Engineering Trainee Days **company registration form** on the Jonk Entrepreneuren Luxembourg website.

During registration, companies are asked to indicate the departments, fields, professions and activities they can offer. This information helps us identify suitable students and make the best possible matches.

Further Information

For further information or any questions about participating in the Engineering Trainee Days, please contact Kyra Gantrel via gantrel@jel.lu.
